

Package ‘tgamtheme’

February 5, 2021

Type Package

Title Globe and Mail Graphics Theme for 'ggplot2'

Version 0.1.0

Maintainer Tom Cardoso <tcardoso@globeandmail.com>

Description

Theme and colour palettes for The Globe and Mail's graphics. Includes colour and fill scale functions, colour palette helpers and a Globe-styled 'ggplot2' theme object.

scale_color_tgam	<i>Color scale constructor for The Globe and Mail's colors</i>
------------------	--

Description

Color scale constructor for The Globe and Mail's colors

Usage

```
scale_color_tgam(palette = "main", discrete = TRUE, reverse = FALSE, ...)
```

```
scale_colour_tgam(palette = "main", discrete = TRUE, reverse = FALSE, ...)
```

Arguments

palette	Character name of palette in <code>tgam_palettes</code> . Currently, one of 'main' or 'alternate'.
discrete	Boolean indicating whether color aesthetic is discrete or not
reverse	Boolean indicating whether the palette should be reversed
...	Additional arguments passed to <code>discrete_scale()</code> or <code>scale_color_gradientn()</code> , used respectively when <code>discrete</code> is TRUE or FALSE

Value

A `ggplot2` colour scale object, to be passed to a `ggplot2` object

Examples

```
library(ggplot2)
ggplot(diamonds, aes(depth, color = cut)) +
  geom_density() +
  xlim(55, 70) +
  scale_color_tgam()
```

scale_fill_tgam *Fill scale constructor for The Globe and Mail's colors*

Description

Fill scale constructor for The Globe and Mail's colors

Usage

```
scale_fill_tgam(palette = "main", discrete = TRUE, reverse = FALSE, ...)
```

Arguments

palette	Character name of palette in tgam_palettes. Currently, one of 'main' or 'alternate'.
discrete	Boolean indicating whether color aesthetic is discrete or not
reverse	Boolean indicating whether the palette should be reversed
...	Additional arguments passed to discrete_scale() or scale_fill_gradientn(), used respectively when discrete is TRUE or FALSE

Value

A ggplot2 colour scale object, to be passed to a ggplot2 object

Examples

```
library(ggplot2)
ggplot(diamonds, aes(carat, fill = cut)) +
  geom_density(position = 'fill') +
  scale_fill_tgam()
```

tgam_cols *Function to extract The Globe and Mail's colors as hex codes*

Description

Function to extract The Globe and Mail's colors as hex codes

Usage

```
tgam_cols(...)
```

Arguments

... Character names of tgam_colors. Colour names include 'burgundy', 'sky', 'salmon', 'gold', 'gray', 'alt1', 'alt2', 'alt3', 'alt4', 'alt5'.

Value

A character vector of one or more colours in The Globe's palette

Examples

```
tgam_cols()
tgam_cols('burgundy')
```

tgam_pal

Return function to interpolate a Globe and Mail color palette

Description

Return function to interpolate a Globe and Mail color palette

Usage

```
tgam_pal(palette = "main", reverse = FALSE, ...)
```

Arguments

palette Character name of palette in tgam_palettes. Currently, one of 'main' or 'alternate'.

reverse Boolean indicating whether the palette should be reversed

... Additional arguments to pass to colorRampPalette()

Value

A character vector of interpolated colour values

Examples

```
tgam_pal()(3)
tgam_pal(palette = 'alternate')(3)
```

`theme_tgam`*ggplot Globe and Mail theme*

Description

Theme function to be passed as an argument during ggplot2 charting.

Usage

```
theme_tgam(  
  size = 12,  
  family = "GMSanC-Regular",  
  title = "GMSanC-Bold",  
  position = "center"  
)
```

Arguments

<code>size</code>	Base font size
<code>family</code>	Font family
<code>title</code>	Font to use for title text
<code>position</code>	How should headings be positioned? Options are 'center' or 'left'. (Default: 'center',)

Value

A ggplot2 theme object, to be passed to a ggplot2 object
