1 CDNmoney Data

In R, this package is made available with

```
> library("CDNmoney")
>
```

As of R-2.1.0 the code from the vignette that generates this guide can be loaded into an editor with *edit(vignette("CDNmoney"))*. This uses the default editor, which can be changed using *options()*. Also, it should be possible to view the pdf version of the guide for this package with *print(vignette("CDNmoney"))*.

This package contains Canadian credit aggregates data and componenet data used to construct the Canadian monetary aggregates. There are are no functions in the package, but the functions in the *ts* and *tframe* packages may be useful for working with the data. Also, the package *tsfa* is being used for research with this data at the Bank of Canada.

The data is documented under *CanadianMoneyData* and *CanadianCredit-Data* in the help system.
