

Package ‘RKEELjars’

November 17, 2021

Type Package

Title Java Executable .jar Files for 'RKEEL'

Version 1.0.20

Date 2021-11-11

Author Jose M. Moyano [aut, cre],
Luciano Sanchez Ramos [aut]

Maintainer Jose M. Moyano <jmoyano@uco.es>

Description 'KEEL' is a popular Java software for a large number of different knowledge data discovery tasks. Furthermore, 'RKEEL' is a package with a R code layer between R and 'KEEL', for using 'KEEL' in R code. This package downloads and install the .jar files necessary for 'RKEEL' algorithms execution. For more information about 'KEEL', see <<http://www.keel.es/>>.

R topics documented:

getExePath	2
getJarList	2
getJarPath	3

Index	4
--------------	----------

getExePath	<i>Get jar executable files Path</i>
------------	--------------------------------------

Description

Method for knowing the KEEL .jar files path.

Usage

```
getExePath()
```

Value

Returns a string with the path of the KEEL .jar files.

Examples

```
getExePath()
```

getJarList	<i>Get a list with all RKEEL algorithm jars</i>
------------	---

Description

Method that returns a list with the jar names from RKEEL

Usage

```
getJarList()
```

Value

Returns a list with the jar names from RKEEL.

Examples

```
getJarList()
```

<code>getJarPath</code>	<i>Get RunKeel.jar Path</i>
-------------------------	-----------------------------

Description

Method for knowing the RunKeel.jar path.

Usage

`getJarPath()`

Value

Returns a string with the RunKeel.jar path.

Examples

`getJarPath()`
